

# Enabling researcher development

## RESEARCH INFRASTRUCTURE SEMINAR SERIES

The UQ Research Infrastructure team warmly invites you to our 2021 Research and Innovation Week Seminar series.

Learn how we facilitate access to world class technologies and training locally and how it can enhance your research capabilities and outcomes.

Our panellists will discuss how training and upskilling available through UQ's infrastructure can boost not just your skills set, but also lead to **industry placement and collaboration opportunities**.

### Who should attend:

Supervisors of research groups, early and mid career researchers, Higher Degree by Research students, researchers working in professional roles within facilities, faculties and schools

**TITLE:** Enabling Researcher Development

**WHEN:** Tuesday 14 September 2021  
10am-12 midday

**WHERE:** Global Change Institute  
Room 275, St Lucia campus

## FOR RESEARCHERS, BY RESEARCHERS

# Panellists

## Speakers

**Dr Amberyn Thomas**

UQ Library

*Research Data: trends, challenges and opportunities.*

**Tayo Adeniyi**

Engagement and Training Lead,  
Protein Expression Facility

*Enabling Researcher, Staff and Student Development - Industry Placements.*

**Dr Mark Crowe**

Skills Development Manager, QCIF

*Boosting your research outcomes with data science training and support.*

**Dr Brooke Purdue**

Operations Manager, Genome Innovation Hub

*Research success through collaboration.*

**Dr Kathryn Hall**

Training and Community Engagement Manager (ACCS Projects), NIF.

*ACCS and the data lifecycle for characterisation science - taking you from acquisition through analysis to deposition*

**Professor Markus Barth**

Theme Leader, ARC Training Centre for Innovation in Biomedical Imaging and Technology

*Student and Researcher Development and Opportunities through the ARC Training Centre for Innovation in Biomedical Imaging and Technology.*

## Participants

**Dr Siddeswara Guru**

Terrestrial Ecosystem Research Network (TERN)

**Stephanie Atkinson**

Masters of Biotechnology student

Industry Placement: Protein Expression Facility (PEF)

**Hosted by Professor Joe Shapter and**

**Associate Professor Kevin Jack**

Research Infrastructure

The event will include a **networking coffee-break**, during which attendees will have an opportunity to browse a **Trade Display expo**, supported by NCRIS (National Collaborative Research Infrastructure Facilities) and UQ's Central Research Platforms (CRP) and other service providers.

**Find out how UQ Research Infrastructure can boost your research goals:**

- Upskilling and training available at Central Research Platforms for your personal and professional growth
- UQ Funding and collaboration opportunities
- NCRIS and UQ CRP capabilities showcase (for full list of exhibitors, please see web site)

**Register here: <https://research.uq.edu.au/week>**

**Ana Vuckovic, Business Development Officer, 0499 034 110**
