

# LIGHT MICROSCOPY @ UQ Workshop

## Fiji: Images 2 numbers

Fiji (Fiji Is Just ImageJ) is an open-source image visualisation and processing program available on all operating systems.

This workshop provides an introduction to basic image processing concepts through to how to build an image analysis pipeline:

Monday 29<sup>th</sup> June

1pm – 4pm

Large Seminar Room (3.142)  
IMB, Building 80

- How to import files
- How to properly adjust visualisation parameters
- Image transformations
- Adding scale bars and exporting files
- Creating image analysis pipelines:
  - Pre-processing
  - Segmentation
  - Object detection
  - Extracting quantifiable data from your images
